

Grant Butler

gronk.droid@gmail.com

Hi there,

My name is Grant Butler, and I am a recent graduate from Florida Tech. I am interested in Software Engineering, Data Science, and Machine Learning. While attending Florida Tech, I took classes like Management and Processing of Big Data, and Machine Learning. I also programmed a capstone project making a full-stack web app that provided guided tours of the campus through GPS. I spent time as a Resident Assistant, and the whole time was shooting sports photography. I have a strong work ethic, and will go the extra mile to ensure quality in all of the work I do. I am an excellent communicator and often find myself helping others understand each other and feel included. Give me a chance, and you won't regret it.

Best,

Grant Butler
